

# INTEGRATED MANAGEMENT SYSTEM

## 2-DAYS AWARENESS WORKSHOP

Integrated Management System (IMS) offers a dynamic approach to organizations seeking to provide Quality products or services to their customers while fulfilling their social responsibilities and obligations towards their employees and community by protecting Health & Safety and Environments.

Any economic activity, be it production or services, in public or private sectors, employs a combination of processes which coordinate and work together to achieve a desired outcome. Such processes use human, material and natural resources to produce desired products or services, which are gainful and profitable to an organization. Inevitably, the processes used have profound effects on the Health and Safety personnel as well as material assets. The activities also interfere with our surroundings, producing environmental effects that are often negative and must be controlled. This may be both a social responsibility as well as a legislative requirement.

Integrated Management System provides a well-defined and demonstrable system to determine requirements for Quality, Safety and Environment and provides ways to meet these requirements.

This course, conducted in a workshop style, is designed to provide an in-depth understanding of how the requirements of quality, safety and environment standards can be integrated and managed together; how documents can be combined and the system can be implemented using a common approach.

**Course Contents:** The course will include:

- Understanding the requirements of ISO 9001:2008, ISO 14001:2004 and OHSAS 18001:2007 Standards
- How to integrate quality, environment and safety systems
- Documentation of IMS
- Hazard Identification and Risk Assessment and Quantification
- Identification of Environmental Aspects associated with activities / processes and impact analysis
- Establishing improvement programs and performance monitoring
- IMS implementation and certification

**Who should attend:** This course is designed for all managerial level; safety managers, supervisors, staff and line managers, project managers and safety officers.

**Course Facilitators:** Course facilitators are competent and qualified safety practitioners with practical industrial and managerial experience.

**Course Material:** Course material given to each participant will include study material and copies of the relevant standard.

**Course Certificate:** Each participant will be entitled for a training certificate.

**Course Schedule and venue:** The training runs from 09:00 to 17:00 hrs with one hour lunch break and two coffee breaks. The venue and the detailed programme will be intimated well in advance of the scheduled dates.
